

# MATHS MEMO

## JAN20 - U6

### January Maths

This month students learnt about:

- Trigonometry and modelling
- Vectors

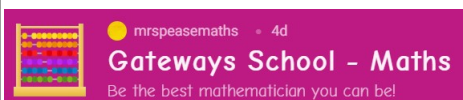

### Trigonometry Assessment

Well done to Annie and Sonia for achieving 100% on our most recent assessment in class, this is an outstanding achievement!

### February Maths

Lessons in February will focus on Mechanics:

- Moments
- Forces and friction

Students should bookmark the maths padlet on their internet browser. It is an online page full of recommended sites to help students be the best mathematicians they can be.

### Dr Frost Maths

This month we have trialled a new online site called Dr Frost Maths. It is proving to be an excellent resource for sixth form students. As well as completing set homework's and topic assessments students can browse through the topics and complete independent practice, the more they do the more points and medals they are awarded.

All of the class has signed up, well done in particular to Nadia and Annie for their hard work on Dr Frost this week!

### Key Dates

Assessment week is coming up after half term!

### Monthly Quote

The only way  
to learn  
mathematics  
is to do  
mathematics.

PAUL HALMOS

### Maths Support

Students can:

- find me in my classroom, S2, during the second half of lunch or after school on Tuesdays and Wednesdays.
- leave feedback online on Hegarty Maths questions, I will reply to queries.
- Email me at [rebecca.pease@gatewaysschool.co.uk](mailto:rebecca.pease@gatewaysschool.co.uk) with any questions they have.

### Funny Maths
